

Device Specifications

TREZOR is a device that enables you to securely manage your digital identity. TREZOR needs no battery since it draws power through its USB connection. All private data are stored in a persistent memory, which will not be erased even if you don't use the device for an extended period of time. TREZOR may be used for a variety of ever-expanding purposes, through a wide range of compatible software. Please refer to respective software documentation for instructions.

Recommended Setup

1. Connect TREZOR via USB to your PC or mobile phone.
2. Open trezor.io/start in web browser.
3. Follow instructions to set up your device.

See *"Important Security Instructions"* for more info.

Treatment and Warranty

Treat your TREZOR device with care. Do not to expose it to extreme temperatures, fire, water, sand, vapors, or chemicals. The device is not waterproof or unbreakable. For full Warranty information, visit trezor.io.

Important Security Instructions

Recovery seed is a backup of the entire TREZOR device in simple English words. In case of damage, loss or theft, you can recover your device with your recovery seed.

Recovery seed is generated and shown to user on request. It is very important for you to write down your recovery seed and to store it safely, away from prying eyes. Be aware that anyone with access to your seed can create a clone of your device. Therefore, **never make a digital copy of your recovery seed and never upload it to online services. Do not lose your seed. Do not disclose your recovery seed to anyone.**

By purchasing a TREZOR device, you are not purchasing the accompanying software. It is entirely up to you which software you decide to use with TREZOR. Keep in mind, that **you may put your private data at risk by using unverified or inadequate software.**

PIN protects your device from unauthorised use. It is a combination of numbers that you must enter before using the device. Make sure you do not disclose your PIN to anybody.

TREZOR cannot be held responsible for security liabilities or financial losses resulting from not following these security instructions.
